

Construction

T Level: Technical Qualification in Building Services Engineering - Electrotechnical Engineering

Campus: Rotherham College

Code: RFECN025

Level: 3

About This Course

T Levels are our new high level courses which follow GCSEs and will be equivalent to three A Levels.

The two-year courses cover core concepts and theories as well as an occupational specialism/Practical Skills needed to provide learners with the skills and knowledge employers are looking for. As part of the course, each learner will experience an in-depth industry placement lasting 45 days. Learners will gain a vital understanding of the workplace and their chosen field of study; employers will gain early access to a talent pipeline for positions within their organisation.

There are four routes available:

On-Site Construction (Bricklaying and Joinery) or Building Services Engineering (Electrical and Plumbing).

Completing a T Level means learners can step up straight into employment, an apprenticeship or a degree with us in site supervisory Level 4 HTQ.

What Will I Study?

Content overview: Onsite & BSE

- Health and Safety in construction
- Construction design principles
- Construction and the built environment industry
- Construction sustainability principles
- Building technology principles
- Construction science principles
- Construction measurement principles
- Construction information and data principles
- Relationship management in construction
- Digital technology in construction
- Construction commercial/business principles

BSE only units:

- Tools, equipment and materials
